

## Dave Easterly

**An experienced Administrator, Programmer, and Trainer with 10+ years of experience**

633 Buchanan St.      Twin Falls, ID 83301      daveeasterly@gmail.com      Phone:208-320-1211

**OBJECTIVE**      My objective is to find an IT or support department with a great spirit of cooperation and teamwork, and to make that team one of the organization's most valuable assets.

**TARGET JOB**      IT Coordinator or Administrator – Systems and/or Network Administration  
Full Time Employee  
My ideal job would involve working with and/or leading a team of professionals in a fast-paced, results oriented environment to provide top quality service and technical expertise. The ideal organization would be a place where teamwork and individual accomplishment are both recognized and encouraged. The environment would be fast paced, professional and friendly.

**EXPERIENCE**

2/2002 - Present      Dell Computer Corporation, Twin Falls, ID  
Enterprise Instructional Design and Delivery Senior Analyst  
Current duties include training of Enterprise Server support agents in the latest server and storage technologies. I am required to be proficient in Server Virtualization using Citrix XenServer (Certified Citrix Admin for XenServer 4.0 and 5.0), VMWare and Hyper-V, Windows Server 2003 and 2008 as well as Linux and enterprise Systems Management applications. I have received recognition and awards for being a Top Performer and Significant Contributor on several occasions.

4/2001 - 2/2002      TruckMaster Data Systems, Inc., Jerome, ID  
Programmer / Analyst - Duties included writing new programs and maintaining existing programs in a language specific to Multi-Value PICK databases, customization of programs for specific clients, Network Administration duties, "New Media" design such as Flash, HTML, and graphics design and software support/customer relations.

7/1999 - 4/2001      Flanary and Sons Trucking, Kingsport, TN  
Network Systems Administrator - Duties included building, setting up, maintaining, and networking all computer systems used to run the company. During my time as SysAdmin, their network more than doubled in size along with the company's growth. Other duties included PICK database administration, Apache webserver administration, Samba SMB server administration, router and security administration, data backup and recovery solutions, project management (EDI implementation, Direct Deposit implementation, vehicle tracking deployment, etc.), and much more. Many other administrative and operational tasks were also my responsibility.
